COMMUNITY UPDATE

After a long break, we have identified a total of 6 positive cases of Covid-19 on 5B and 8 on 2A. All residents will be screened for symptoms and monitored for any change in condition.

Residents that tested negative during outbreak testing will be monitored closely and retested between 5-7 days. Residents that are not up to date with all recommended doses of the Covid-19 vaccine will be placed on droplet precautions. Anyone entering these rooms must wear a gown and gloves in addition to a mask. If no further cases are identified, precautions will be discontinued after 7 days. The floating of staff to and from this unit will be minimized, environmental cleaning has been enhanced and staff are being audited on proper use of personal protective equipment.

The Community Transmission level in Albany County is HIGH. We ask if you have had symptoms consistent with Covid-19, have tested positive for Covid-19 or have been in close contact with someone with Covid-19 in the last 10 days, regardless of your vaccination status, that you refrain from visiting.

All visitors require proof of a negative test within 24 hours of their visit. Test kits are available in the lobby. During your visits, we ask that you visit your loved one in their room and adhere to the core principles of infection control such as washing your hands frequently, wearing a mask and social distancing.

If you have any questions, please feel free to contact (518) 456-2000.

Sincerely,

A handwritten signature in black ink, appearing to read "Frank K. Yeboah".

Frank K. Yeboah, Administrator.
